## Setting Up Audio on the Macintosh

What will you need?

Hardware & Software

Computer

- Apple Desktop machine or iMac
- iBook, Powerbook or MacBook Pro

Recording

There is a range of possibilities for the recording, and review, of captured audio...

- Headset/microphone combination ~ USB powered preferably (my preferred option)
- Microphone ~ USB powered preferably
- Lapel or "lavalier" microphone Voice recorder with digital capability
- Voice recorder (analog) with USB connectivity
- · Digital still camera with voice and/or video record capability

## Setting up for the recording on your Apple computer ~ getting the audio correct

## 1. System Preferences

It is wise to check your audio set-up before you begin working with GarageBand. This may save some troubleshooting later.

Select System Preferences... from the Apple menu.

The window illustrated will appear.

Click on the **Sound** icon at the end of the listed **Hardware** items in the second row. The following window will appear.

http://blog.larkin.net.au/

Click on the **Input** tab on the right and select the desired method for recording your audio. You have may have two or more choices. In the example below there are three choices:

Internal omni-directional microphone (eg; located under left speaker grille)

Name	Port	
Internal microphone	Built-in	
Line In	Audio line-in port	
Logitech USB Headset	USB	

Line in  $\sim$  mini-jack stereo input jack for a stereo microphone

Name	Port	
Internal microphone	Built-in	
Line In	Audio line-in port	
Logitech USB Headset	USB	

Headset input is via USB
