Publishing a podcast with Podcast Maker

Before you begin...

Have you already created the podcast file (mp3, mp4, etc) using GarageBand, Audacity or Quicktime? Remember to locate that mp3 or mp4 file and store it in a place so that you can drag it onto the Podcast Maker window. You use Podcast Maker to set up and publish your podcasts. Do you have images for your podcast as well?

Setting Up The Podcast

Locate the Podcast Maker application on your computer and open it.

Select New Podcast from the File menu.
